

COMMON RAIL FILTRATION

DIESEL FILTERS

HIGH FLOW FILTERS

HIGH FLOW

The Automotive range is capable of filtering fuel flows exceeding 300 Litres per hour.

Most Common Rail Vehicles have fuel flows of 100-200 Litres per hour through the filters.

VEHICLE KITS

Custom filter kits available. Contain all mounting brackets, fittings and hoses for quick and easy fitment that looks factory.

REMOVE WATER

Extra Water separator capacity when used in conjunction with OEM filter assembly (recommended)

PERFORMANCE

The pre-filter package removes particles 30micron and greater allowing better performance from the OEM filter (only filtering the smaller particles 2—30 micron).
